

Getting Started

Make sure you have **npm** and **composer** on your local machine

1. Clone this repository <https://github.com/praewfah/memory-game-card.git> and cd into it
2. Run `composer install` and `npm install` to download Laravel dependencies
3. Run `php artisan key:generate --show` to generate a key then set to **APP_KEY** add to in Config Vars
4. Set up the following key for your database in Config Vars (*required)
APP_KEY
DB_CONNECTION
DB_DATABASE
DB_HOST
DB_PASSWORD
DB_PORT
DB_USERNAME
5. run `php artisan migrate`
6. Execute `composer dump-autoload`
7. Execute `npm run dev` to build project assets
8. Execute `php artisan serve` to run the project in your browser
